

LIST OF GRAPHS

Graph No.	Title	Page No.
4.1	Effect of fiber type and weaves on UPF values	128
4.2	Effect of Cloth cover factor on UPF value	130
4.3	Effect of thickness on UPF value	131
4.4	Effect of weight per unit area on UPF value	132
4.5	Effect of commercial UV absorbers on UPF value of plain fabric	135
4.6	Effect of commercial UV absorbers on UPF value of twill fabric	137
4.7	Effect of Acacia Catechu colourant on UPF value of plain weave fabric	142
4.8	Effect of Acacia Catechu colourant on UPF value of twill weave fabric	143
4.9	Effect of K/S value on UPF values	145
4.10	Percent soil uptake of treated and untreated plain weave fabrics	157
4.11	Percent soil uptake of treated and untreated twill weave fabrics	157
4.12	Percent soil-release after laundry (3cycles) of untreated and treated fabrics	160
4.13	Percent Soil-redeposition during laundering on untreated and treated fabrics	163
4.14	Effect of various finishes individually and in combination on UPF value of polyester/cotton blend plain weave fabric	166
4.15	Effect of launderings on percent UVR transmission of untreated and treated fabrics with combination finish	168
4.16	Effect of perspiration on percent UVR transmission of untreated and treated fabrics with finishes in combination	170

Graph No.	Title	Page No.
4.17	Percent soil-uptake of on untreated and treated fabric with finishes in combination	173
4.18	Effect of various finishes individually and in combination on percent soil-release of polyester/cotton blend plain and twill weave fabrics	174
4.19	Percent soil-redposition during laundering of untreated and treated fabrics	176
4.20	Thickness of untreated and treated fabrics with finishes in combination on plain and twill weave	180
4.21	Weight per unit area of untreated and treated fabrics with finishes in combination on plain and twill weave	181
4.22	Air-permeability of untreated and treated fabrics with finishes in combination on plain and twill weave	182
4.23	Warp bending length of untreated and treated fabrics with finishes in combination on plain and twill weave	184
4.24	Weft bending length of untreated and treated fabrics with finishes in combination on plain and twill weave	185
4.25	Total crease recovery angle of the untreated and treated fabrics with finishes in combination on plain and twill weave	186
4.26	Load in kg of the untreated and treated fabrics with finishes in combination on plain and twill weave	189
4.27	Elongation in cm of the untreated and treated fabrics with finishes in combination on plain and twill weave	189
