

LIST OF FIGURES

2.1	Mechanisms of particle deposition in the airways	49
3.1	Regressed calibration curve for PC/HSPC	96
3.2	Regressed calibration curve for CHOL	98
3.3	Regressed calibration curve for the estimation of LN by spectrophotometry	100
3.4	Regressed calibration curve for the estimation of LN by spectrofluorimetry	101
3.5	Regressed calibration curve for the estimation of LEU by spectrophotometry	102
3.6	Regressed calibration curve for the estimation of LH by RIA	103
4.1	Effect of Drug:PC ratio on PDE of LN liposomes prepared by TFH and REV methods	133
4.2	Effect of PC:CHOL ratio on PDE of LN liposomes prepared by TFH and REV methods	133
4.3	Effect of temperature and time of freezing on PDE of LN liposomes	135
4.4	Effect of Sonication Time on PDE and Vesicle size of LLN, Batch 05	137
4.5	Effect of lipid quantity on PDE of LLEU	143
4.6	Effect of HSPC:CHOL ratio on PDE of LLEU	143
4.7	Effect of solvent system on PDE of LLEU	144
4.8	Effect of methanol:chloroform ratio on PDE of LLEU	144
4.9	Effect of Extrusion cycles on PDE and Vesicle size of LLEU	145
4.10	Effect of Extrusion cycles on PDE and Vesicle size of LLEU _n	146
4.11	Photomicrographs of the optimized liposomal batches	147
5.1	Design of Diffusion cell	164
5.2	Drug Retention Studies of LLN formulation	178
5.3	Drug Retention Studies of LLEU formulations	180
5.4	Cumulative % LN diffused during In vitro diffusion studies	182

5.5	Mean Flux and Diffusion Coefficient values of LN formulations	184
5.6	Cumulative % LEU diffused during in vitro diffusion studies	186
5.7	Mean Flux and Diffusion Coefficient values of LEU formulations	187
5.8	Plot of mean plasma level of Levonorgestrel Vs time following oral and nasal administration	189
5.9	Plot of mean serum level of LH Vs time following s.c and nasal administration of Leuprolide acéate	196
6.1	SEM of LLN-DPI, LLEU-DPI and LLEUn-DPI at 2000X magnification	223
6.2	Drug Retention Studies of LLN-DPI formulation	230
6.3	Drug Retention Studies of LLEU formulations	232
6.4	Cumulative % LN diffused during In vitro diffusion studies	234
6.5	Mean Flux and Diffusion Coefficient values of LN formulations	235
6.6	Cumulative % LEU diffused during In vitro diffusion studies	237
6.7	Mean Flux and Diffusion Coefficient values of LEU formulations	238
6.8	Plasma LN concentration profile after intratracheal and oral administration of LN formulations	241
6.9	LH release profile after intratracheal and subcutaneous administration of LEU formulations	242
