

I consider myself fortunate to have been associated with Dr. P.K.Bhattacharya, M.Sc., Ph.D., Reader, Inorganic Chemistry, M. S. University of Baroda, Baroda-2 and I take this opportunity to express my deep sense of appreciation for getting inspiration in the field of coordination chemistry in general and particularly the work presented in this thesis. I am deeply indebted to him, for his inspiring guidance during the course of these investigations pertaining to material presented in this thesis.

In presenting this thesis, I express my sincere thanks to Professor S.M. Sethna, Pro-Vice Chancellor, M.S.University, Baroda (former Head, Department of Chemistry) and Professor K.N.Trivedi, Head, Department of Chemistry, M.S.University of Baroda, Baroda-2 for providing research facilities.

I am thankful to Dr. S.S. Lele, M.Sc., Ph.D., Reader, Analytical Chemistry and Mr. S.S. Madhav Rao, M.Sc., Micro-Analyst for the Carbon, Hydrogen and Nitrogen estimations of the compounds isolated.

Thanks are due to Sarabhai Chemicals, Quality Control Division for providing Infra-Red spectra of the compounds.

I also wish to record my sincere thanks and appreciation to all my colleagues and friends in the department who have helped me in various ways in the preparation of the thesis. I am also thankful to the University Grants Commission, New-Delhi, for the award of Junior Research Fellowship.

Lastly, the credit goes to my father and husband for their immense interest and constant encouragement and to other family members who shouldered many domestic difficulties during the research period.
