List of Figure	i
List of Table	vi
Abbreviation	viii
Chapter-1 Introduction	
1.1. Luminescence phenomenon	1
1.1.1. History	1
1.1.2. Luminescence Mechanism	2
1.1.2.1. Fluorescence	3
1.1.2.2. Phosphorescence	4
1.1.3. Luminescence Emission	5
1.1.4. Types of Luminescence	6
1.1.4.1. Photoluminescence	7
1.1.4.2. Thermoluminescence	7
1.1.4.3. Electroluminescence	8
1.1.4.4. Chemiluminescence	8
1.1.4.5. Cathodoluminescence	9
1.1.4.6. Radioluminescence	9
1.1.4.7. Bioluminescence	9
1.1.4.8. Mechanoluminescence	9
1.2. Role of the Rare Earths	10
1.3. Introduction to Perovskite	12
1.4. Luminescent Perovskites and Concerned Literature Review	14
Objectives of the Thesis	18
Thesis layout	19
Reference	21
Chapter-2 Synthesis Method and Characterizations	
2.1. Synthesis Method	25
2.1.1. Combustion Route of Synthesis	25
2.1.1.1. Merits and Demerits	26
2.2 Material Characterization Techniques	27

2.2.1. X-ray Diffraction (XRD)	27
2.2.1.1 Instrument Used to Monitor Diffraction Patterns	28
2.2.1.2 Applications of XRD	28
2.2.2 Scanning Electron Microscopy (SEM)	29
2.2.2.1 Instrument Used to SEM Micrograph Recording	29
2.2.2.2. Applications of SEM	30
2.2.3 Fourier Transform Infrared (FTIR)	30
2.2.3.1 Instrument Used to FTIR Study	30
2.2.3.2 Applications of FTIR	31
2.2.4 Photoluminescence (PL)	31
2.2.4.1 Instrument Used Photoluminescence Study	31
2.2.4.2 Applications of PL	32
2.2.5 Thermoluminescence (TL)	32
2.2.5.1 Instrument Used Thermoluminescence Glow Curve Measurements	32
2.2.5.2 Applications of TL	33
Reference	34
Chapter-3 Niobate Based Double Perovskite Phosphors	
3.1. Introduction	37
3.2. Synthesis Method and Characterization Techniques	38
3.2.1. Phosphor Preparation	38
3.2.2 Characterizations	38
3.3 Results and Discussion	39
3.3.1 XRD Studies	39
3.3.2 SEM Studies	44
3.3.3 FTIR Studies	44
3.3.4 Photoluminescence Studies	46
3.3.5 Thermoluminescence Studies	61
Reference	72
Chapter-4 Vanadate Based Double Perovskite Phosphors	
4.1. Introduction	78

4.2. Synthesis and Characterizations	79
4.2.1. Phosphor Preparation	79
4.2.2 Characterizations	79
4.3 Results and Discussion	80
4.3.1 XRD Studies	80
4.3.2 SEM Studies	84
4.3.3 EDAX Studies	85
4.3.4 FTIR Studies	87
4.3.5 Photoluminescence Studies	88
4.3.6 Thermoluminescence Studies After Beta Irradiation	101
4.3.7 Thermoluminescence Studies After UV Irradiation	109

<i>Reference</i>	114

Chapter-5 Tungstate Based Double Perovskite Phosphors

5.1. Introduction	120
5.2. Experimental and Characterizations	121
5.2.1. Phosphor Preparation	121
5.2.2 Characterizations	121

Part-I Luminescence studies of $\text{Ca}_3\text{WO}_6\text{:Tb}^{3+}$

5.3. Results and Discussion	122
5.3.1 XRD Studies	122
5.3.2 SEM Studies	126
5.3.3 EDAX Studies	126
5.3.4 FTIR Studies	128
5.3.5 Photoluminescence Studies	129
5.3.6 Thermoluminescence Studies	133

Part-II Luminescence studies of $\text{Ca}_3\text{WO}_6\text{:Ho}^{3+}$

5.4. Results and Discussion	140
5.4.1 XRD Studies	140
5.4.2 SEM Studies	143
5.4.3 EDAX Studies	143

5.4.4 FTIR Studies	145
5.4.5 Photoluminescence Studies	145
5.4.6 Thermoluminescence Studies	155
<i>Reference</i>	164
Chapter-6 Conclusion and Future Studies	
6.1. Conclusions	170
6.1.1 Chapter-1 Conclusion	170
6.1.2 Chapter-2 Conclusion	170
6.1.3 Chapter-3 Conclusion	170
6.1.4 Chapter-4 Conclusion	171
6.1.5 Chapter-5 Conclusion	172
6.1.5.1 Part-I Luminescence Studies of $\text{Ca}_3\text{WO}_6:\text{Tb}^{3+}$	172
6.1.5.2 Part-II Luminescence Studies of $\text{Ca}_3\text{WO}_6:\text{Ho}^{3+}$	173
6.2. Future Studies	174
