

LIST OF TABLES

<u>TABLE</u>		<u>PAGE</u>
1.	Chemical structures of resin	2
2.	Wrinkle recovery (°) of finished fabrics at different curing conditions (Effect of temperature on curing).. .. .	39
3.	Tensile strength of finished fabrics at different treatments	41
4.	Percentage elongation at varying loads of finished fabrics at different treatments	43
5.	Analysis of free and total formaldehyde from finished fabrics at different treatments	48
6.	Analysis of total and liberated formal- dehyde from finished fabrics at different treatments	52
7.	Relationship between wrinkle recovery(°) and percent formaldehyde of finished fabrics at different treatments	58
8.	Relationship between tensile strength(lbs) and percent formaldehyde of finished fabrics at different treatments	66
9.	Relationship between wrinkle recovery (°) and tensile strength (lbs) of finished fabrics at different treatments.	68
