

LIST OF FIGURES

<u>FIGURE</u>		<u>PAGE</u>
1.	Effect of different curing conditions on wrinkle recovery (°) of finished fabrics at different treatment	40
2.	Effect of different treatments on wrinkle recovery (°) and tensile strength (lbs) of finished fabrics	42
3(a)	Percentage elongation Vs load of finished fabrics at different treatments.	44
(b)	Percentage elongation Vs load of finished fabrics at different treatments	45
4.	Free formaldehyde content of finished fabrics at different treatments	46
5.	Relation between total and liberated formaldehyde of finished fabrics at different treatments	48
6.	Relationship between wrinkle recovery(°) and percent formaldehyde of finished fabrics at different treatments	54
7.	Relationship between tensile strength and percent formaldehyde of finished fabrics at different treatments	54
8.	Relationship between wrinkle recovery (°) and Tensile strength (lbs) of finished fabrics at different treatments	59
