

LIST OF TABLES

TABLE	PAGE
1. Various catalytic systems used	54
2. Preliminary data of the fabrics.....	61
3. Change in tensile strength of fabrics (warp) at varying concentrations using two redox catalytic Systems	63
4. Change in tensile strength of fabrics (warp) at varying concentrations using two redox catalytic Systems	65
5. Physical properties of fabrics (warp) treated with acrylamide finish (application: single step)	68
6. Physical properties of fabrics (warp) treated with acrylamide finish (application: two step)..	69
7. Physical properties of fabrics (warp) treated with acrylamide finish (application: two step)..	70
7a. Physical properties of fabrics (warp) treated with acrylamide finish (application: two step)..	71
7b. Physical properties of fabrics (warp) treated with acrylamide finish (application: two step)..	72
7c. Physical properties of fabrics (warp) treated with acrylamide finish (application: two step)..	73
8. Wrinkle recovery of fabrics (warp) at varying add-on of acrylamide, DMDHEU and their combin- ation finishes (air dried).....	78
8a. Wrinkle recovery of fabrics (warp) at varying add-on of acrylamide, DMDHEU and their combin- ation finishes (cured at 130c)	80
9. Stiffness of fabrics (warp) at varying add-on of acrylamide, DMDHEU and their combination finishes (air dried)	84
9a. Stiffness of fabrics (warp) at varying add-on of acrylamide, DMDHEU and their combination finishes (cured at 130c)	86
10. Tensile strength of fabrics (warp) at varying add-on of acrylamide, DMDHEU and their combina- tion finishes (air dried)	88

10a.	Tensile strength of fabrics (warp) at varying add-on of acrylamide, DMDHEU and their combination finishes (cured at 130°c).....	90
11	Percent elongation of fabrics (warp) at varying add-on of acrylamide, DMDHEU and their combination finishes (air dried)	92
11a.	Percent elongation of fabrics (warp) at varying add-on of acrylamide, DMDHEU and their combination finishes (cured at 130°c)	94
12.	Finish content, as percent add-on at varying concentrations (air dried).....	98
12a.	Finish content, as percent add-on at varying concentrations (cured at 130°c).....	99
13.	Wrinkle recovery of finished fabrics (air dried).....	100
13a.	Wrinkle recovery of finished fabrics (cured at 130°c).....	101
14.	Stiffness of finished fabrics (air dried).....	102
14a.	Stiffness of finished fabrics (cured at 130°c)...	103
15.	Appearance rating for cotton fabric (A)	110
16.	Appearance for cotton polyester fabric (B).....	113
17.	Appearance rating for polyester fabric (C)	116
18.	Wrinkle recovery of fabrics (warp) at varying add-on of acrylamide precondensate and its combination with DMDHEU (air dried)	122
18a.	Wrinkle recovery of fabrics (warp) at varying add-on of acrylamide precondensate and its combination with DMDHEU (cured at 130°c).....	125
19.	Stiffness of fabrics (warp) at varying add-on of acrylamide precondensate and its combination with DMDHEU (air dried).....	129
19a.	Stiffness of fabrics (warp) at varying add-on of acrylamide precondensate and its combination with DMDHEU (cured at 130°c).....	132
20.	Tensile strength of fabrics (warp) at varying add-on of acrylamide precondensate and its combination with DMDHEU (air dried).....	136

20a.	Tenside stength of fabrics (warp) at varying add-on of acrylamide precondensate and its combination with DMDHEU (cured at 130°c)	139
21.	Percent elongation of fabrics (warp) at varying add-on of acrylamide precondesate and its combination with DMDHEU (air dried)	142
21a.	Percent elongation of fabrics (warp) at varying add-on of acrylamide precondesate and its combination with DMDHEU (cured at 130°c).....	145
22.	Finish content as percent add-on at varying concertation (air dried)	149
22a.	Finish content as percent add-on at varying concertation (cured at 130°c)	150
23.	Wrinkle recovery of finished fabrics (air dried).	151
23a.	Wrinkle recovery of finished fabrics (cured at 130°c).....	152
24.	Stiffness of finished fabrics (air dried)	153
24a	Stiffness of finished fabrics (cured at 130°c)...	154
