

INDEX

Chapter I – Introduction

The reproductive process	2
Female reproductive physiology	2
Embryogenesis and fetal growth	3
Function of hormones in brain development and sexual behavior	3
Neuroendocrinology	5
Hypothalamus	6
GnRH	8
The anterior pituitary lobe	16
Gonadotropins	18
Ovarian steroidogenesis	28
Steroid metabolism	31
Effect of neurotransmitters and neuromodulators on H-P-G axis	34
Endocrine changes in pregnancy	39
Reproductive toxicity	44
Heavy metals	45
Lead	46
Cadmium	58
Effects of lead and cadmium on reproductive system	68
Biochemical aspects of metal toxicity	78
Mechanism of lead and cadmium induced effects	79
Objectives of the study	92

Chapter II- Materials and methods

Chemicals	95
Animals	95
Assays	95
17β-hydroxy steroid oxidoreductase and 3α-hydroxy steroid dehydrogenase	95
UDP-Glucuronyl transferase	98

Cytochrome P450	100
Pituitary membrane preparation	101
Measurement of membrane fluidity	101
Na <sup>+</sup> K <sup>+</sup> ATPase	102
Schiffs base	105
Inorganic peroxides	105
Amine measurements	107
Estimation of 5-HT	108
Estimation of Norepinephrine and Dopamine	109
LH and FSH estimation (Radio immuno assay)	109
Metallothionein fraction preparation	111
Metal analysis	111
Reduced glutathione (GSH)	113
Lipid peroxidation levels (LPO)	114
Superoxide dismutase (SOD)	116
Catalase (CAT)	118
Cholesterol estimation	119
Glycogen content	120
Estimation of DNA	121
Estimation of RNA	122
Alkaline phosphatase (ALP) and acid phosphatase (ACP)	123
Creatinine	124
Glutamate pyruvate transaminase (GPT)	125
Hemoglobin	127
Histology	128
Statistical analysis	128

### **Chapter III – Effect of lead and cadmium either alone or in combination on hepatic, hypothalamic and pituitary steroid metabolism in non pregnant rats**

Introduction	130
Experimental design	131

Results	133
Discussion	144
Summary	155

#### **Chapter IV – Effect of lead and cadmium either alone or in combination on hypothalamic-pituitary axis function in non pregnant rats**

Introduction	158
Experimental design	159
Results	160
Discussion	164
Summary	166

#### **Chapter V – Effect of lead and cadmium either alone or in combination on pregnant rats**

Introduction	169
Experimental design	170
Results	171
Discussion	179
Summary	187

#### **Chapter VI – The mechanism of action of lead and cadmium either alone or in combination**

Introduction	190
Experimental design	191
Results	193
Discussion	200
Summary	206

#### **Chapter VII – Summary**
