<b>1 INTRODUCTION AND LITERATURE REVIEW</b>	<b>1-37</b>
1.1 INTRODUCTION	1
1.2 HISTORICAL BACKGROUND OF CHITIN AND CHITOSAN	6
1.3 CHEMISTRY OF CHITIN AND CHITOSAN	7
1.4 PRODUCTION OF CHITIN AND CHITOSAN	9
1.5 PHYSICAL PROPERTIES OF CHITOSAN	14
1.5.1 Colour of chitin and chitosan	14
1.5.2 Degree of deacetylation	14
1.5.3 Molecular weight	15
1.5.4 Solubility	16
1.5.5 Viscosity	17
1.5.6 Chitosan hydrogel	18
1.5.7 Chitosan membranes	19
1.5.8 Chitosan beads	19
1.5.9 Chitosan fibres	20
1.6 BIOLOGICAL PROPERTIES OF CHITOSAN	20
1.6.1 Biodegradability	20
1.6.2 Non toxicity and biocompatibility	21
1.6.3 Antimicrobial Activity	22
1.7 CHEMICAL PROPERTIES OF CHITOSAN	23
1.8 APPLICATIONS OF CHITOSAN	23
1.8.1 Agriculture	23

1.8.2	Applications in food technology	24
1.8.3	Applications of chitosan in cosmetics	24
1.8.4	Applications of chitosan in biomedicine	25
1.8.5	Paper industry	26
1.8.6	Chromatography	26
1.8.7	Solid state batteries	27
1.8.8	Biocatalysis	27
1.8.9	Molecularly imprinted materials	27
1.8.10	Water processing	27
1.8.11	Textiles	28
	REFERENCES	28
<b>2</b>	<b>SYNTHESIS AND CHARACTERIZATION OF VARYING MOLECULAR WEIGHT CHITOSANS AND THEIR APPLICATION ON COTTON FABRIC</b>	<b>38 -117</b>
2.1	INTRODUCTION	38
2.2	MATERIALS AND METHODS	47
2.2.1	Fabric	47
2.2.2	Dyes and chemicals	47
2.2.3	Purification of chitosan	47
2.2.4	Synthesis of low molecular weight chitosan	49
2.2.5	Fabric treatment with chitosan	49
2.2.6	Application of chitosan by pad-dry-alkali process	49
2.2.7	Dyeing with direct dyes	50
2.2.8	Dyeing with acid dyes	50
2.2.9	Determination of tenacity	51
2.2.10	Determination of viscosity	51
2.2.11	FTIR analysis	51
2.2.12	<sup>1</sup> H-NMR spectroscopy	52
2.2.13	Elemental analysis	52
2.2.14	Scanning electron microscopy	52

2.2.15	Evaluation of indices	52
2.2.16	Evaluation of stiffness of fabric	52
2.2.17	Evaluation of absorbency of fabric	53
2.2.18	Determination of crease recovery angle of fabric	53
2.2.19	Soil burial test	53
2.3	RESULTS AND DISCUSSION	53
2.3.1	FTIR spectroscopy	54
2.3.2	<sup>1</sup> H-NMR Spectroscopy	55
2.3.3	Elemental analysis	57
2.3.4	Studies on determination of viscosity average molecular weight of chitosan	58
2.3.5	Depolymerization of chitosan for synthesizing low molecular weight chitosans	61
2.3.6	Effect of molecular weight and concentration on viscosity of chitosan solutions	68
2.3.7	Effect of storage time on viscosity of chitosan solution	69
2.3.8	Effect of electrolyte on viscosity of chitosan solution	74
2.3.9	Application of chitosan (CHT) derivatives on cotton fabric: Pad-Dry-Cure process	78
2.3.10	Surface morphology of chitosan treated fibres	79
2.3.11	Effect of chitosan treatment on appearance and feel of cotton fabric	80
2.3.12	Effect of chitosan treatment on absorbency cotton fabric	86
2.3.13	Dyeing behaviour	87
2.3.13.1	<i>Effect of chitosan pretreatment on direct dyeing of cotton fabric</i>	88
2.3.13.2	<i>Effect of chitosan treatment on colour depth of direct dyed cotton fabric</i>	94
2.3.13.3	<i>Effect of chitosan pretreatment on acid dyeing of cotton fabric</i>	97
2.3.14	Effect of chitosan treatment on wrinkle recovery property of cotton fabric	99

2.3.15	Effect of chitosan treatment on resistance against microorganism of cotton fabric	101
2.3.16	Pad-dry-alkali process	105
	REFERENCES	107
<b>3</b>	<b>SYNTHESIS AND CHARACTERIZATION OF NANO - CHITOSAN DISPERSIONS AND THEIR APPLICATION ON COTTON FABRIC</b>	<b>118 – 159</b>
3.1	INTRODUCTION	118
3.2	MATERIALS AND METHODS	123
3.2.1	Fabric	123
3.2.2	Dyes and chemicals	123
3.2.3	Synthesis of low molecular weight chitosan	123
3.2.4	Synthesis of nano-chitosan and its characterization	124
3.2.5	Preparation of nano silver (Ag) colloid	124
3.2.6	Determination of viscosity	124
3.2.7	Treatment of cotton fabric with nano-chitosan	124
3.2.8	Dyeing with direct dyes	125
3.2.9	Scanning electron microscopy	125
3.2.10	Determination of indices and stiffness of fabric	125
3.2.11	Determination of tenacity	125
3.2.12	Determination of absorbency and crease recovery angle of fabric	125
3.2.13	Soil burial test	125
3.3	RESULTS AND DISCUSSION	126
3.3.1	Synthesis and characterization nano chitosan	126
3.3.2	Effect of molecular weight of chitosan on particle size	134
3.3.3	Effect of concentration of chitosan on particle size	135
3.3.4	Effect of TPP concentration on particle size	138
3.3.5	Viscosity behaviour of nano chitosan dispersion	140
3.3.6	Effect of nano chitosan treatment on cotton fabric	144

3.3.7	Effect of nano chitosan treatment on appearance and feel of cotton fabric	145
3.3.8	Effect of nano chitosan on tensile properties of cotton fabric	146
3.3.9	Effect of nano chitosan treatment on absorbency of cotton fabric	147
3.3.10	Dyeing behaviour of nano chitosan treated cotton fabric	149
3.3.11	Effect of nano chitosan on crease recovery property of cotton fabric	151
3.3.12	Effect of nano chitosan treatment on cotton fabric on its resistance against microorganism	152
	REFERENCES	155
<b>4</b>	<b>SYNTHESIS AND CHARACTERIZATION OF <i>N</i>-SUBSTITUTED CHITOSAN DERIVATIVES AND THEIR APPLICATION ON COTTON FABRIC</b>	<b>160 – 283</b>
4.1	INTRODUCTION	160
4.2	MATERIALS AND METHODS	168
4.2.1	Fabric	168
4.2.2	Dyes and chemicals	168
4.2.3	Synthesis of <i>N, N, N</i> -Trimethyl chitosan chloride	169
4.2.4	Synthesis of <i>N</i> -Alkyl and <i>N</i> -Aryl chitosan derivatives	170
4.2.5	Fabric treatment with chitosan and chitosan derivatives by pad-dry cure process	171
4.2.6	Dyeing with direct dyes	171
4.2.7	Dyeing with acid dyes	171
4.2.8	FTIR spectra analysis	171
4.2.9	<sup>1</sup> H-NMR spectra analysis	171
4.2.10	Elemental analysis	171
4.2.11	Measurement of pH of liquor	171
4.2.12	Conductometric titrations	172
4.2.13	Determination of viscosity	172
4.2.14	Determination of appearance and stiffness of fabric	172

4.2.15	Evaluation of strength loss due to chlorine retention	172
4.2.16	Determination of tenacity	173
4.2.17	Determination of absorbency and crease recovery angle of fabric	173
4.2.18	Evaluation of soiling behaviour	174
4.2.19	Soil burial test	174
4.3	RESULTS AND DISCUSSION	174
4.3.1	Synthesis and characterization	174
4.3.1.1	<i>Synthesis of N, N, N-trimethyl chitosan chloride</i>	175
4.3.1.1.1	<i>Reaction mechanism</i>	175
4.3.1.1.2	<i>FTIR spectra analysis</i>	177
4.3.1.1.3	<i>Conductometric titrations</i>	178
4.3.1.1.4	<i><sup>1</sup>HNMR spectroscopy</i>	182
4.3.1.1.5	<i>Elemental analysis</i>	185
4.3.1.1.6	<i>Effect of reaction conditions on degree of quaternization of TMCHT</i>	187
4.3.1.2	<i>Synthesis of N-alkyl N, N-dimethyl chitosan chloride</i>	192
4.3.1.2.1	<i>Reaction mechanism</i>	195
4.3.1.2.2	<i>FTIR spectroscopy of N-alkylated chitosans</i>	196
4.3.1.2.3	<i>Analysis of <sup>1</sup>HNMR spectra of N-alkylated chitosans</i>	198
4.3.1.2.4	<i>Elemental analysis</i>	210
4.3.1.2.5	<i>Conductometric titrations</i>	211
4.3.1.3	<i>Synthesis of N-aryl N, N-dimethyl chitosan chloride</i>	215
4.3.1.3.1	<i>Reaction mechanism</i>	215
4.3.1.3.2	<i>FTIR analysis of N-aryl CHT derivatives</i>	216
4.3.1.3.3	<i><sup>1</sup>HNMR spectroscopy</i>	218
4.3.1.3.4	<i>Elemental analysis</i>	225
4.3.1.3.5	<i>Conductometric titrations</i>	226
4.3.2	Viscosity behavior of N- substituted CHT derivatives	231

4.3.3 Treatment of cotton fabric with <i>N</i> -substituted CHT derivatives	238
4.3.3.1 <i>Effect of N- substituted CHT treatment on appearance of cotton fabric</i>	239
4.3.3.2 <i>Effect of N- substituted CHT treatment on stiffness of cotton fabric</i>	242
4.3.3.3 <i>Effect of N-substituted CHT treatment on chlorine retention property</i>	244
4.3.3.4 <i>Effect of N- substituted CHT treatment on absorbency of cotton fabric</i>	247
4.3.3.5 <i>Effect of N- substituted CHT treatment on direct dyeing of cotton fabric</i>	249
4.3.3.6 <i>Effect of N- substituted chitosan treatment on colour depth of direct dyed cotton fabric</i>	256
4.3.3.7 <i>Effect of N- substituted CHT treatment on acid dyeing</i>	259
4.3.3.8 <i>Effect of N-substituted CHT treatment on wrinkle recovery properties of cotton fabric</i>	261
4.3.3.9 <i>Effect of N- substituted CHT treatment on soiling behaviour of cotton fabric</i>	262
4.3.3.10 <i>Effect of N- substituted CHT treatment on resistance against microorganism of cotton fabric</i>	269

<b>5 APPLICATION OF CHITOSAN AND ITS DERIVATIVES IN COMMERCIAL WATER PROCESSING AND EFFLUENT TREATMENT</b>	<b>284 - 355</b>
5.1 INTRODUCTION	284
5.2 MATERIALS AND METHODS	290
5.2.1 Fabric	290
5.2.2 Dyes and chemicals	290
5.2.3 Hydrogen peroxide bleaching of cotton fabric	292
5.2.4 Dyeing with direct dyes	292
5.2.5 Treatment of water containing calcium ions with chitosan derivatives	292

5.2.6	Treatment of water containing Cu(II) ions with chitosan derivatives	293
5.2.7	Treatment of dye waste water (effluent) with chitosan derivatives	293
5.2.8	FTIR analysis	294
5.2.9	Atomic Absorption Spectroscopy	294
5.2.10	Determination calcium ions in water by EDTA titrimetric method	294
5.2.11	Measurement of pH of liquor	295
5.2.12	Iodometric method for determination of Cu(II) ions	295
5.2.13	Gravimetric analysis of adsorbent -metal complex	295
5.2.14	Purification and strength determination of direct and acid dyes	296
5.3	RESULTS AND DISCUSSION	296
5.3.1	Chelation study with calcium ions	296
5.3.1.1	<i>Characterization and mechanism of chelation of calcium ions on chitosan</i>	299
5.3.1.2	<i>Effect of structural modification of chitosan on chelation of calcium ions</i>	301
5.3.1.3	<i>Effect of concentration of chitosan derivatives on chelation of calcium ions</i>	305
5.3.1.4	<i>Effect of pH on chelation of calcium ions</i>	309
5.3.1.5	<i>Effect of particle size chelation of calcium ions</i>	312
5.3.2	Chelation study with copper ions	314
5.3.2.1	<i>Characterization and mechanism of chelation of Cu (II) ions on chitosan</i>	317
5.3.2.2	<i>Quantitative evaluation of Cu (II) ions</i>	319
5.3.2.3	<i>Effect of structural modification of chitosan on chelation of Cu (II) ions</i>	321
5.3.2.4	<i>Effect of pH on chelation of Cu (II) ions</i>	325
5.3.2.5	<i>Effect of concentration of chitosan derivatives on chelation of Cu(II) ions</i>	328
5.3.2.6	<i>Effect of particle size chelation of Cu(II) ions</i>	332

5.3.3 Decolourization of dye waste water	334
