

## C O N T E N T S

CHAPTER		PAGE
	INTRODUCTION	1
	RESUME	7
1	Studies on developing avian liver 1. The rate of growth and metabolic functions of liver of pigeon during post-hatching period.	18
2	Studies on developing avian liver 2. Activities of acetylcholinesterase in the liver and serum and the ionic concentrations in the liver of post-hatching developing pigeons.	28
3	Studies on developing avian liver 3. Ascorbic acid level in the liver and kidney of pigeon during post-hatching development.	38
4	Studies on developing avian liver 4. The correlation of lipogenic function of the liver with thyroid activity in pigeon during post-hatching development.	46
5	Studies on developing avian liver 5. Activities of non-specific acid and alkaline phosphatases in liver and serum of pigeon during post-hatching development.	59
6	Studies on developing avian liver 6. Activities of succinate dehydrogenase, adenosine triphosphatase and lactate dehydrogenase in the liver of pigeon during post-hatching development.	75

CHAPTER	PAGE	
7	Studies on developing avian liver 7. The correlation of functional maturity of the liver with the functions of certain endocrine glands in pigeon during post-hatching development.	90
8A	Neuroendocrine regulation of blood sugar level in pigeon.	105
8B	Cholinergic assistance to the release and action of insulin in rats.	115
9	Comparative studies on the influence of insulin and acetylcholine on the transport of glucose and glycogen deposition in liver slices of pigeon and rat.	125
10	Effect of glucose injection on the activities of glycogen synthetase, glucose-6-phosphate dehydrogenase, 'malic' enzyme and lactate dehydrogenase in the liver of pigeon.	137
11	Studies on certain aspects of metabolism and its regulation in the liver of growing and adult pigeons.	
	A GENERAL CONSIDERATION	150
