

ACKNOWLEDGEMENT

Research is not just the work of an individual, instead it's a collaborative job. My PhD work has been the result of constant support and advice from a lot of people, both in my professional life as well as personal life. These individuals have helped in enriching me as a person through their knowledge and this thesis would not be complete without expressing my heartfelt gratitude to them.

Firstly, and more importantly, I would like to express my sincere gratitude to my PhD supervisor, ***Dr. Mitesh Sarkar***, Assistant Professor, Department of Physics, Faculty of Science, The Maharaja Sayajirao University of Baroda, Vadodara, Gujarat without whose encouragement, understanding and support I wouldn't have had made it through in my PhD journey. His mentoring, advice, suggestions, timely discussions, tolerance, organized mannerisms has been quite helpful during the course of my research work. At the same time, he also provided me enough liberty to pursue my research work in a way that would enhance the study. Not only is he accessible in the department but I could also call him after working hours without any hesitation for the sake of completing any urgent work. Apart from research, I also thank him for the advice he gave me to face the world out there.

I want to extend my sincere gratitude to ***Dr. R. Venkatesh***, ***Dr. Mukul Gupta*** and ***Dr. Uday Deshpande*** from UGC DAE CSR, Indore, India for providing Physical Property Measurement System (PPMS), X-ray Diffraction and UV-Visible measurement facilities respectively as well as for the discussions I could have regarding the data and their analysis. I also extend my sincere thanks to ***Mr. Aravind*** from the Department of Physics, IIT Madras for carrying out PPMS measurements at their departmental facility. I am also extremely grateful to ***Mr. Manoj Prajapat*** of CIF, IISER Bhopal who helped me tremendously in getting the magnetic measurements done.

I am thankful to **Prof. R.C. Tandel** (Professor and Head, Department of Applied Chemistry, The Maharaja Sayajirao University of Baroda) and **Prof. A. Bedekar** (Professor and Head of the Department, Department of Chemistry, The Maharaja Sayajirao University of Baroda) for extending support by providing the Fourier Transform Infrared Spectroscopy facility.

I also extend my sincere thanks to **Prof. Haribhai Kataria**, Dean Faculty of Science, The Maharaja Sayajirao University of Baroda for all kinds of support and quick help and for having a student-friendly attitude. My sincere gratitude to **Prof. P.K. Jha**, Head of the Department of Physics, The Maharaja Sayajirao University of Baroda access the access to the facilities, for the continuous encouragement and help provided during the various stages of my work.

I also thank **Prof. P.K. Mehta** and **Dr. Keyur Vyas**, faculties at Department of Physics for providing support to carry out experimental measurements. I also acknowledge other teaching faculties of the department for their motivation and helpful advice at every step. I would also like to thank the non-teaching staff of the department for their help and support in non-academic work. A special thanks to **Mr. Chandrakant Patel** who works in the Workshop of the department for the time he spent making large number of quartz tube ampoules for me, helping me in setting the oxygen cylinder as well as treating me with his hand prepared tea.

I am also thankful to **Mr. Satyendra Singh** from UGC DAE CSR, Indore for carrying out an experimental measurement and for the discussions and suggestions that were quite helpful to me.

A special gratitude to two beautiful people who are very close to my heart, **Prof. Jyoti Rao**, retd. Head of Department, Department of Physics, Ramnarain Ruia College, Mumbai and **Mrs. Yamuna Pillai**, my English teacher at school whom I look up to and respect whole-heartedly. I was always inspired by how they taught me and by all the inspirational and life lessons they delivered during

the lectures. Their simplicity is what makes them stand out as exceptional teachers I have had in my life.

My thesis work was supported by the grant provided by UGC DAE CSR, Indore through Collaborative Research Scheme (CRS) during the period 2018 – 2021. I also sincerely acknowledge Government of Gujarat for the Scheme of Developing High Quality Research (SHODH) fellowship for a period of two years from 2021 – 2023.

Several people have helped make this PhD journey easier for me. For that reason, no words are enough to thank my friends from the bottom of my heart. Firstly, my close friends who belong to different spheres of my life *Amruta Sadhu, Rutuja Narvekar, Shesha Patel, Mahatta Oza, Nidhi Astik, Abhishek Sharma, Nakul Soni, Jolly Joy, Kavita Mishra* who constantly supported and encouraged me during various phases of my life. Their unconditional support and philosophical discussions with them can never be forgotten. My seniors, *Naveen Bhai* and *Nishant Bhai*, both served as good coaches to me at the academic as well as personal level, and I will be highly indebted to them for that. My fruitful discussions with them, their readiness to help me out whenever I needed help, and their lively attitude made me sail through the journey without much hassle.

I also want to thank my other departmental friends *Chaitanya Limberkar, Ratankumar Singh, Ashwini Mahadik, Nilesh Patel, Tithi Joshi, Manali Pancholi* and *Heera Nair* for being a positive influence in my life and sharing moments of laughter and happiness during the research period. Also thankful to *Sharad Pillai* and *Som Narayan* for helping me out with an experimental analysis.

My deepest gratitude to my relatives, my extended family, and my cousins, with whom I share a very strong bond, for their love and constant support at every step of my life and for always checking upon me.

Finally, I owe whatever I am today to my beloved father, Late ***Mr. I. Soman*** and my loving mother, ***Mrs. Renuka Soman***. No words can do justice to the amount of support, love and freedom they have provided me both during the good and bad times since my childhood. Their kind and loving words have always been like a silver lining to me and that made me confident to face the world and become a better person. My late father was the one who pushed me to extend my limits, become independent, travel as much as I can and gain practical experiences and I can never be more grateful to him for that. He may not be with me today, but I can feel him looking after me at every step of my life. I cannot thank my mother enough for the sacrifices she has been making ever since I started working on my thesis.

Last but not the least, I thank God for everything, for the good and bad in my life and for showing me a path whenever my mind would be shrouded with uncertainty.

Menon Sitara Soman
