

TABLE OF CONTENTS

Acknowledgements	i-iii
Table of Contents	iv-v
Abstract of thesis	vi-viii
Chapter 1	Introduction
1.1	Overview on Materials 3
1.2	Overview on Crystal growth 7
1.3	Applications of Crystals 7
1.4	Objectives 8
	References 8
Chapter 2	Experimental Techniques
2.1	Introduction 12
2.2	Preparation of stoichiometric charge 12
2.3	crystal growth 15
2.4	Zone Melting Technique 15
2.5	Scanning electron microscope 16
2.6	Energy dispersive analysis by X-rays 16
2.7	X-ray diffraction Technique 17
2.8	Pelletize Unit 19
2.9	Fourier Transform Infrared (FT-IR) Spectroscopy 19
2.10	Thermoelectric power measurement 21
2.11	Hall Effect Measurements 22
2.12	Micro Hardness Measurement Technique 23
	References 25
Chapter 3	Growth and characterization InBi_{1-x}Te_x crystals
3.1	Introduction 26
3.2	Crystal growth Method 27
3.3	Synthesizing the Compound 31
3.4	Crystal Growth and surface morphology 31
3.5	X-Ray diffraction analysis 34
3.6	Crystallite size 36

3.7	Energy Dispersive Analysis of x-rays	37
3.8	Conclusions	43
	References	43
Chapter 4	Optical and Transport characteristic of InBi_{1-x}Te_x crystals	
4.1	Introduction	46
4.2	IR Analysis and Band gap	47
4.3	Hall measurements	53
4.4	Thermo electric measurement	55
4.5	Conclusions	61
	References	61
Chapter 5	Microhardness of InBi_{1-x}Te_x Crystals	
5.1	Introduction	63
5.2	Vicker's microhardness of InBi _{1-x} Te _x Crystals	66
5.3	Meyer's Index	70
5.4	Effect of Annealing	72
5.5	Effect of Cold Working	74
5.6	Conclusions	77
	References	77
	Future Scope	79
	List of paper and poster presented in National and International Conferences	80
