A Note on Transliteration

This research draws upon written and spoken sources in different Indic languages, including *Sam̐skṛta*, *Hindī* and *Mārwārī*. To justify original textual and spoken sources as well as for the sake of consistency and clarity, I referred transliteration table of “ISO 15919- Transliteration of Devnāgarī” it is one of a series considered for international standards of romanisation by the International Organisation for Standardisation.

¹ व = *Wa* is not the part of “ISO 15919”, but additionally include into the table, as required for the transliteration of *Mārwārī* terms, so as to facilitate the action of correct pronunciation.
