
List of Tables

Table 1.1: <i>Magnaporthe oryzae</i> effector proteins identified till date	21
Table 2.1: Oligo-nucleotide primers used for molecular characterization of <i>M. oryzae</i> field isolates	46
Table 2.2: Primers used to study the relative gene expression of BGC-O1 genes	54
Table 3.1: List of <i>Magnaporthe</i> isolates collected from different geographic locations	59
Table 3.2: Scoring displaying presence/absence variations in AVR genes and mating type in <i>M. oryzae</i> isolates	72
Table 4.1: Summary of Raw reads obtained from Illumina sequencing method	87
Table 4.2: De novo assembly statistics and gene prediction content of <i>M. oryzae</i> strains sequenced in this study	96
Table 4.3: Proportions of different types of repetitive elements in <i>M. oryzae</i> genomes	97
Table 4.4: Total number of novel putative effectors predicted in different field strains of <i>M. oryzae</i>	100
Table 5.1: <i>M. oryzae</i> and <i>M. grisea</i> genomes used in this study	112
Table 5.2: Summary of ortholog pairs between the genomes of millet isolate (MZ5-1-6) and rice isolate (70-15)	132
