

Acknowledgement

At this very important juncture of my life, when I was writing this thesis, I felt that this work was not only the result of the hard work put in by me, but it also took some remarkable contributions from many others. I want to take this opportunity to acknowledge their contributions towards reaching this landmark of my life.

First and foremost, I am overwhelmingly and everlastingly grateful to my esteemed guide, guru, and idol Dr. Jaita Sharma who has put faith in my capabilities and agreed to be my Ph.D. guide. She has been always a source of inspiration for me. Despite her great knowledge of the subject, she was always down to earth, always available, and accessible for any academic discussions. I cannot forget the way she made me comfortable in self-learning and understanding the subject which was completely new to me. Her continuous encouragement has given me the necessary impetus to pursue this work. It is not possible for me to quantify and describe my gratitude to her in words as it was not possible for me to complete this work without her support (academic and emotional) encouragement, and constructive criticism which made me work hard. It is my privilege to acknowledge Prof. (Dr.) Raju K Gorge for his understanding, encouragement, and personal attention which have provided a smooth basis for my PhD tenure. I am also grateful and deeply obliged to Dr. P. Muthukumar for his constant encouragement and everlasting moral support.

The gist of the Sanskrit shloka

जननि जन्मभूमिश्च जाह्नवीश्च जनार्दनः।
जनकः पञ्चमश्चैव जकाराः पञ्च दुर्लभाः॥

turned out to be true for me too. My Parents (*Janani and Janak*) puts in a lot of effort to follow my dreams. I would like to dedicate this work to them because, without their continuous support and encouragement, I couldn't concentrate on my work and achieve whatever little I could. Though my father does not belong in the same field and my mother, a homemaker, always extended all kinds of support and encouragement to pursue my research. I also thank all other family members for extending their warmth and all possible support to me.

I am profoundly grateful to Professor (Dr.) Dhanesh Patel, Dean of the Faculty of

Technology, The Maharaja Sayajirao University of Baroda, whose unwavering support and mentorship have been instrumental in navigating the complexities of doctoral research. His leadership and encouragement have provided a steady foundation upon which I have built my academic pursuits.

My journey would not have been possible without the invaluable contributions of the members of the Departmental Research Committee Dr. R.C.Shah, Dr. Trupti Shah, and Dr. Y. H. Gandhi. Their kind suggestions and humble nature have been instrumental in shaping my journey. I pray to God to impart you always with good health, peace, achievement, and tons of happiness. Their collective wisdom and insightful feedback have shaped the trajectory of my research, pushing me to strive for excellence and innovation.

I am thankful to the professors of the Department of Applied Mathematics, especially Dr. Bharat Ratanpal. He is not just my mentor; he is my idol who always encourages me to do research. I am fortunate to have very good colleagues who created a healthy and lively work environment where I always felt comfortable. I am also grateful and deeply obliged to, Dr. B.M.Shah, Dr. S.B. Rao, Dr. Nilima Shah, and Dr. Nimisha Pathak for motivating me to achieve this goal.

I am grateful to all teachers and professors of the Department of Mathematics especially Prof.(Dr.) H. R. Kataria, Prof.(Dr.) R.G. Vyas, Prof.(Dr.) B.I. Dave, Dr.V.O.Thomas, and Ms. Shilpa R. Gupta for their support and kind suggestions throughout my journey.

Friends and colleagues Dr. Neetu Sharma, Mr.Amar Mangrola, Mr. Anil Chavda, Mr. Ajay Pathak, Dr. Pooja Shah are the ones with whom we spend most of our time and hence they can influence our mindset and research of this kind. They have always adjusted themselves so that I can do my work with maximum capacity. I would like to extend my special thanks to my classmate Dr. Akhil Mittal for motivating me to complete this goal as soon as possible. I am immensely grateful to my best colleague Mrs. Gargi J Trivedi who has always supported me in every aspect of my research work. She was so inspiring all the time and a person who was always spreading smiles in every situation. I am glad to have a colleague/sister like her who has always encouraged for the best. Being a very cooperative, caring, and supportive friend, she has kept me away from losing my spirit.

I am also deeply grateful to my friend Dr. Pankaj Sharma, who always treats me like a son, for his unwavering support. Last but not least I would like to thank the Faculty of Technology and Engineering and The M.S. University of Baroda for allowing me to be part of their eminent community. I also thank all the office staff for being nice and supportive of my work.

Vishant Shah
