I	Background	6
1	Introduction and Mathematical Preliminaries	1
1.1	Introduction & Historical Background	1
1.2	Mathematical Preliminaries	4
1.2.1	Some Results from Analysis	4
1.2.2	Controllability of Linear Systems	5
1.2.3	Controllability of Semilinear Systems	7
1.3	Layout of the thesis	9
II	Research Work	12
2	Generalized Impulsive Systems	13
2.1	Introduction	14
2.2	Definitions and Assumptions	15
2.2.1	Assumptions	15
2.3	Existence and Uniqueness Theorems	17
2.3.1	Example	23
2.4	Conclusion	24

3	Controllability of Generalized Impulsive Systems	25
3.1	Introduction	26
3.2	Controllability of Linear Impulsive Systems	27
3.3	Controllability of Nonlinear Impulsive Systems	32
3.4	Application	36
3.5	Conclusion	38
4	Trajectory Controllability of Impulsive Systems	39
4.1	Introduction	40
4.2	Preliminaries	41
4.3	T-controllability with local conditions	41
4.4	T-controllability with non-local conditions	46
4.5	Conclusion	50
5	Trajectory Controllability of Second-order Impulsive Systems	52
5.1	Introduction	53
5.2	Preliminaries	54
5.3	TC without Impulses	55
5.4	TC with Impulses	60
5.5	Conclusion	64
6	Generalized Non-instantaneous Cauchy Problem	65
6.1	Introduction	66
6.2	Preliminaries	67
6.3	Equation with Local Conditions	68
6.4	Equation with Non-local Conditions	72

6.5	Conclusion	77
7	Fractional Impulsive Cauchy Problem	78
7.1	Introduction	79
7.2	Prelimnaries	80
7.3	Motivation	81
7.4	Mild and Classical solutions without Impulses	83
7.5	Mild and Classical solutions with Impulses	89
7.6	Conclusion	94
8	Noninstantaneous Impulsive Hilfer Fractional System	95
8.1	Introduction	96
8.2	Preliminaries	97
8.3	Equation with Classical Conditions	99
8.4	Equation with Nonlocal Conditions	104
8.5	Conclusion	111
9	Trajectory Controllability of Hilfer Fractional Systems	112
9.1	Introduction	113
9.2	Preliminaries	114
9.3	Trajectory Controllability with Classical Condition:	117
9.4	Trajectory Controllability with Nonlocal Condition	120
9.5	Conclusion	122
	Publications	123
	Presentations	124

Future Work	126
Bibliography	128
