Sr. No.	Content	Page No.
1	Introduction and Literature Review	1-24
2	Materials and Methodology	25-33
3	Results and Discussion	34-162
	Chapter 1: Brachyuran Crab Diversity on Kamboi Coast	34-50
	Chapter 2: Brachyuran Crab Distribution on Kamboi Coast	51-67
	Chapter 3: Burrow Architecture of Brachyuran Crabs	68-129
	Chapter 4: Effect of Lunar Cycle on Burrowing Behaviour	130-143
	Chapter 5: Foraging Behaviour and Bioturbation Activity	144-165
4	Conclusion	166-169
5	Bibliography	170-225
6	Publication and Presentations	

❖ Table of Figures:

Figure No	Title	Page No.
1.1	Classification of marine environment	8
2.1	Location of the study site: Kamboi Coast, Gulf of Khambhat, Gujarat, India	25
2.2	Descriptive map of study area. A & B: Entire region of Gulf of Khambhat showing its peculiar structural features, C: Apical most northern region of the gulf showing the mouth of Mahi and Sabarmati Rivers, D: The entire survey area from coastal village Dahegam (Left star) to Nahar (Right star), E: the area along coast of Kamboi which was actually studied for the present research.	26
2.3	Scheme of sampling of counting and measuring of burrows of <i>Austruca sindensis</i> (Alcock, 1900), <i>Ilyoplax sayajiraoi</i> Trivedi, Soni, Trivedi & Vachhrajani, 2015 and <i>Dotilla blanfordi</i> Alcock 1900 during duration of tidal exposure on various lunar phases at Mud-flats of Gulf of Khambhat, Gujarat, India. Q: quadrat, TR: transect	31
3.1	<i>Dotilla blanfordi</i> Alcock, 1900 (A-Dorsal surface; B-Ventral surface); <i>Macrophthalmus sulcatus</i> H. Milne Edwards, 1852 (C-Dorsal surface; D- Ventral surface)	46
3.2	<i>Ashtoret lunaris</i> (Forskål, 1775) (A-Dorsal surface; B-Ventral surface); <i>Austruca sindensis</i> (Alcock, 1900) (C-Dorsal surface; D- Ventral surface)	46
3.3	<i>Eurycarcinus orientalis</i> A. Milne-Edwards, 1867 (A-Dorsal surface; B-Ventral surface); <i>Ilyoplax sayajiraoi</i> Trivedi, Soni, Trivedi & Vachhrajani, 2015 (C-Dorsal surface; D- Ventral surface)	47
3.4	<i>Parasesarma persicum</i> Naderloo & Schubart, 2010 (A-Dorsal surface; B-Ventral surface); <i>Scylla serrata</i> (Forskål, 1775) (C-Dorsal surface; D- Ventral surface)	47

3.5	<i>Austruca iranica</i> Alcock 1900; <i>B. Heteropanope glabra</i> Stimpson, 1958	48
4.1	Different zones of intertidal area based on sediment composition at Kamboi Coast, Gulf of Khambhat, Gujarat, India.	56
4.2	Seasonal variation in the mean values of temperature at different intertidal region	58
4.3	Seasonal variation in burrow density of different burrowing crab species along the intertidal region of Kamboi coast.	59
4.4	Seasonal variation in burrow abundance of different burrowing crab species along the intertidal region of Kamboi coast.	59
4.5	Seasonal variation in frequency of burrow occurrence of different burrowing crab species along the intertidal region of Kamboi coast.	60
4.6	Intertidal distribution of six burrowing crab species at Kamboi coast.	61
4.7	Intertidal distribution of three abundantly distributed brachyuran crab species at Kamboi coast in B. winter season; C. Summer season and D. Monsoon season.	62
5.1	Burrow architecture of <i>Austruca sindensis</i> (Alcock, 1900) with various measurements of burrow cast. a. J-shaped burrow, b. Spiral burrow, c. S-shaped burrow, d. Single tube burrow, e. U-shaped burrow, f. Multi-branched burrow, g. J-shaped with Branch burrow. (TDB – Total depth of Burrow; TLB – Total length of burrow; IA– Burrow inclination angle; CL – Chamber length; CW – Chamber width)	74
5.2	Indicates number of burrow count with respect to shape of the burrow in <i>Austruca sindensis</i> (Alcock, 1900).	75
5.3	Regression analysis for the relationship between crab carapace length and crab carapace width (CW) and Burrow opening diameter (BOD) <i>Austruca sindensis</i> (Alcock, 1900) in winter season.	80

5.4	Regression analysis for the relationship between crab carapace length and Total length (TLB) and Total depth (TDB) of burrow burrows of <i>Austruca sindensis</i> (Alcock, 1900) in winter season.	81
5.5	Regression analysis for the relationship between crab carapace length and Burrow volume (BV) and Inclination angle (IA) of burrows of <i>Austruca sindensis</i> (Alcock, 1900) in winter season.	82
5.6	Vertical temperature profiles with the burrow depth in S-shaped and J-shaped burrows of <i>Austruca sindensis</i> (Alcock, 1900) during winter season.	83
5.7	Vertical temperature profiles with the burrow depth in spiral and single tube (ST) burrows of <i>Austruca sindensis</i> (Alcock, 1900) during winter season.	84
5.8	Scree plot indicating major 2 plots for winter season	85
5.9	Component plot in rotated space for winter season	86
5.10	Regression analysis for the relationship between crab carapace length and crab carapace width (CW) and Burrow opening diameter (BOD) <i>Austruca sindensis</i> (Alcock, 1900) in summer season.	88
5.11	Regression analysis for the relationship between crab carapace length and Total length (TLB) and Total depth (TDB) of burrow burrows of <i>Austruca sindensis</i> (Alcock, 1900) in summer season.	89
5.12	Regression analysis for the relationship between crab carapace length and Burrow volume (BV) and Inclination angle (IA) of burrows of <i>Austruca sindensis</i> (Alcock, 1900) in summer season.	90
5.13	Vertical temperature profiles with the burrow depth in S-shaped and J-shaped burrows of <i>Austruca sindensis</i> (Alcock, 1900) during summer season.	91
5.14	Vertical temperature profiles with the burrow depth in single tube (ST) burrows of <i>Austruca sindensis</i> (Alcock, 1900) during summer season	92
5.15	Scree plot indicating major 2 plots for summer season	93
5.16	Component plot in rotated space for summer season	93

5.17	Regression analysis for the relationship between crab carapace length and crab carapace width (CW) and Burrow opening diameter (BOD) <i>Austruca sindensis</i> (Alcock, 1900) in monsoon season.	96
5.18	Regression analysis for the relationship between crab carapace length and Total length (TLB) and Total depth (TDB) of burrow burrows of <i>Austruca sindensis</i> (Alcock, 1900) in monsoon season.	97
5.19	Regression analysis for the relationship between crab carapace length and Burrow volume (BV) and Inclination angle (IA) of burrows of <i>Austruca sindensis</i> (Alcock, 1900) in monsoon season.	98
5.20	Vertical temperature profiles with the burrow depth in single tube (ST) burrows of <i>Austruca sindensis</i> (Alcock, 1900) during monsoon season.	99
5.21	Vertical temperature profiles with the burrow depth in I-shaped and S-shaped burrows of <i>Austruca sindensis</i> (Alcock, 1900) during monsoon season.	100
5.22	Scree plot indicating major 2 plots for monsoon season	101
5.23	Component plot in rotated space for monsoon season	102
5.24	Regression analysis for the relationship status between crab carapace length and burrow opening diameter of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 burrows during pre-monsoon season.	108
5.25	Regression analysis for the relationship between crab carapace length and total length; total depth of burrow of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during pre-monsoon season.	109
5.26	Regression analysis for the relationship between crab carapace length and burrow volume; Inclination angle of burrow of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during pre-monsoon season.	110

5.27	Regression analysis for the relationship status between crab carapace length and burrow opening diameter; total length of burrow (TLB) of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during post-monsoon season.	111
5.28	Regression analysis for the relationship status between crab carapace length and total depth of burrow (TDB); burrow volume of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during post-monsoon season.	112
5.29	Regression analysis for the relationship status between crab carapace length and inclination angle of burrow of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during post-monsoon season.	113
5.30	Mean variation in Carapace length and burrow opening diameter of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 between pre-monsoon and post-monsoon.	114
5.31	Mean variation in total length and total depth of burrow of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 between pre-monsoon and post-monsoon.	115
5.32	Mean variation in burrow volume and inclination angle of burrow of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 between pre-monsoon and post-monsoon.	116
5.33	Mean variation in Carapace length and burrow opening diameter between male and female host crab individuals of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during pre-monsoon.	117
5.34	Mean variation in total length and total depth of burrow between male and female host crab individuals of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during pre-monsoon.	118
5.35	Mean variation in burrow volume and burrow inclination angle between male and female host crab individuals of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during pre-monsoon.	119

5.36	Mean variation in Carapace length and burrow opening diameter between male and female host crab individuals of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during post-monsoon.	120
5.37	Mean variation in total length and total depth of burrow between male and female host crab individuals of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during post-monsoon.	121
5.38	Mean variation in burrow volume and burrow inclination angle between male and female host crab individuals of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during post-monsoon.	122
5.39	Vertical temperature profiles with the depth of burrow pit during pre-monsoon	123
5.40	Vertical temperature profiles with the depth of burrow pit during post-monsoon	124
6.1	Representative image of eight phase of Lunar cycle.	132
6.2	Average densities of <i>Austruca sindensis</i> burrows during the lunar cycle on Kamboi coast, Gulf of Khambhat, Gujarat.	135
6.3	Average densities of <i>Ilyoplax sayajiraoi</i> burrows during the lunar cycle on Kamboi coast, Gulf of Khambhat, Gujarat.	135
6.4	Average densities of <i>Dotilla blanfordi</i> burrows during the lunar cycle on Kamboi coast, Gulf of Khambhat, Gujarat.	136
6.5	Average diameter of <i>Austruca sindensis</i> burrows during the lunar cycle on Kamboi coast, Gulf of Khambhat, Gujarat.	136
6.6	Average diameter of <i>Ilyoplax sayajiraoi</i> burrows during the lunar cycle on Kamboi coast, Gulf of Khambhat, Gujarat.	137
6.7	Average diameter of <i>Dotilla blanfordi</i> burrows during the lunar cycle on Kamboi coast, Gulf of Khambhat, Gujarat.	137
6.8	Hour wised variation in densities of <i>Austruca sindensis</i> burrows during the lunar cycle on Kamboi coast, Gulf of Khambhat, Gujarat. A- 0hr; B- 1.5hr; C-3hr; D-4.5hr; E-6hr	139

6.9	Hour wised variation in densities of <i>Austruca sindensis</i> burrows during the lunar cycle on Kamboi coast, Gulf of Khambhat, Gujarat: A- 0hr; B- 1.5hr; C-3hr; D-4.5hr	140
6.10	Hour wised variation in densities of <i>Austruca sindensis</i> burrows during the lunar cycle on Kamboi coast, Gulf of Khambhat, Gujarat: A- 3hr; B- 4.5hr	140
7.1	Representative illustration of the role of burrowing crab in nutrient recycling	145
7.2	Regression analysis for the relationship of crab Carapace Length (CL) with burrow opening diameter, total area of foraging, and total number of mudballs of burrows of <i>Austruca sindensis</i> (Alcock, 1900).	153
7.3	Regression analysis for the relationship of crab Carapace Length (CL) with total weight of mudballs, average size of mudballs, and distance between mudballs of burrows of <i>Austruca sindensis</i> (Alcock, 1900).	154
7.4	Regression analysis for the relationship of crab carapace length (CL) with burrow opening diameter, total area of foraging, and total number of mudballs of burrows of <i>Ilyoplax sayajiraoi</i> Trivedi, Soni, Trivedi & Vachhrajani, 2015.	155
7.5	Regression analysis for the relationship of crab Carapace Length (CL) with total weight of mudballs, average size of mudballs, and distance between mudballs of burrows of <i>Ilyoplax sayajiraoi</i> Trivedi, Soni, Trivedi & Vachhrajani, 2015.	156
7.6	Regression analysis for the relationship between Burrow opening diameter and Dry weight of Mudballs of the individual burrow of <i>Austruca sindensis</i> (Alcock, 1900).	159
7.7	Regression analysis for the relationship between Burrow opening diameter and Dry weight of Mudballs of the individual burrow of <i>Ilyoplax sayajiraoi</i> Trivedi, Soni, Trivedi & Vachhrajani, 2015.	159
7.8	Average daily output of bioturbation potential of different crab species per square meter	160

❖ **Table of Tables:**

Table No	Title	Page No.
3.1	List of the brachyuran crab species recorded.	38
2.1	Represents four distinct zones at Kamboi coast.	55
3.1	Burrow characteristics of <i>Austruca sindensis</i> (Alcock, 1900)	77
3.2	Indicates Pearson correlation between various burrow parameters of <i>Austruca sindensis</i> (Alcock, 1900) for Winter season in Zone I	78
3.3	Indicates Pearson correlation between various burrow parameters of <i>Austruca sindensis</i> (Alcock, 1900) for Winter season in Zone II	79
3.4	Total Variance in Winter season in <i>Austruca sindensis</i> (Alcock, 1900)	85
3.5	Indicates Pearson correlation between various burrow parameters of <i>Austruca sindensis</i> (Alcock, 1900) for Summer season in Zone I	87
3.6	Indicates Pearson correlation between various burrow parameters of <i>Austruca sindensis</i> (Alcock, 1900) for Summer season in Zone II	87
3.7	Total Variance in Summer season in <i>Austruca sindensis</i> (Alcock, 1900)	92
3.8	Indicates Pearson correlation between various burrow parameters of <i>Austruca sindensis</i> (Alcock, 1900) for Monsoon season in Zone I	94
3.9	Indicates Pearson correlation between various burrow parameters of <i>Austruca sindensis</i> (Alcock, 1900) for Monsoon season in Zone II	95

3.10	Total Variance in Monsoon season in <i>Austruca sindensis</i> (Alcock, 1900)	101
3.11	Burrow parameters of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during pre-monsoon. (CL: Carapace length; CW: Carapace width; BOD: Burrow opening diameter; TLB: Total length of burrow; TDB: Total depth of burrow; BV: Burrow volume; IA: Inclination angle; B1l: Branch 1 length; ChL: Chamber length; ChW: Chamber width)	106
3.12	Burrow parameters of <i>Ilyoplax sayajiraoi</i> JN Trivedi, Soni, DJ Trivedi & Vachhrajani, 2015 during post-monsoon. (CL: Carapace length; CW: Carapace width; BOD: Burrow opening diameter; TLB: Total length of burrow; TDB: Total depth of burrow; BV: Burrow volume; IA: Inclination angle; B1l: Branch 1 length; ChL: Chamber length; ChW: Chamber width)	107
4.1	Temperature variation (maximum and minimum) observed on Kamboi coast, Gulf of Khambhat, Gujarat, during each lunar phase	133
5.1	Variation in foraging and mud balling pattern between different sexes of <i>Austruca sindensis</i> (Alcock, 1900). (BOD: burrow opening diameter; TFA: total foraging area; TNM: total number of mudballs; TWM: total weight of mudballs; AMS: average mudball size; ADM: average distance between mudballs; SW: seaward; LW: landward)	152
5.2	Variation in foraging and mud balling pattern between different sexes of <i>Ilyoplax sayajiraoi</i> Trivedi, Soni, Trivedi & Vachhrajani, 2015. (BOD: burrow opening diameter; TFA: total foraging area; TNM: total number of mudballs; TWM: total weight of mudballs; AMS: average mudball size; ADM: average distance between mudballs; SW: seaward; LW: landward)	158
