List of Figures

2.1 One loop self energy diagram 15

3.1 Quark model diagram for semi-leptonic decay of meson 30

3.2 Form factor for $B_s \to K^{(*)-}$ transitions 34

3.3 Differential decay rates for $B_s \to K^{(*)-}$ transitions 35

3.4 Form factor for $B_s \to D_s^{(*)-}$ transitions 38

3.5 Differential decay rates for $B_s \to D_s^{(*)-}$ transitions 38

3.6 Normalized differential decay rates as a function of recoil parameter Eq. (3.16) for $B_s \to D_s^* \mu^+ \nu_\mu$ along with LHCb data [1] 40

3.7 Form factors for $B \to (\pi, \rho, \omega)$ and $B_s \to (K, K^*)$ transitions 48

3.8 Differential branching fractions (solid lines - excluding resonances, dashed lines - including vector resonances) for $B \to (\pi, \rho, \omega)$ and $B_s \to (K, K^*)$ transitions. 49

3.9 Form factors comparision for $B \to \pi$ (left) and $B_s \to K$ (right) transitions with pQCD [2], RQM [3, 4], SUSY [5], CQM [6], LCSR [7], LFQM [8]. 56

3.10 Form factors comparision for $B \to \rho$ (left), $B \to \omega$ (middle) and $B_s \to K^*(892)$ (right) transitions with RQM [3, 4], LCSR [9], CQM [6] and LFQM [8, 10]. 57

3.11 Form factors comparision for $B \to \rho$ (left), $B \to \omega$ (middle) and $B_s \to K^*(892)$ (right) transitions with RQM [3,4], LCSR [9] and CQM [6]. . . 58

3.12 Form factor for $B \to \pi$ and $B_s \to K$ transitions (obtained in CCQM (solid broad lines) and in LQCD computations (dots with uncertainties) by RBC and UKQCD collaboration [11]). 59

4.1 Forward-Backward Asymmetry for $B_s \to K^{(*)-}$ transitions 72

4.2 Convexity parameters for $B_s \to K^{(*)-}$ transitions 72

4.3 Longitudinal polarization for $B_s \to K^{(*)-}$ transitions 73

4.4 Transverse polarization for $B_s \to K^{(*)-}$ transitions 73

4.5 Longitudinal Polarization Fraction for $B_s \to K^*$ transition 73

4.6 Forward-Backward Asymmetry for $B_s \to D_s^{(*)-}$ transitions 74

4.7 Convexity parameters for $B_s \to D_s^{(*)-}$ transitions 74

4.8 Longitudinal polarization for $B_s \to D_s^{(*)-}$ transitions 74

4.9 Transverse polarization for $B_s \to D_s^{(*)-}$ transitions 75

4.10 Longitudinal Polarization Fraction for $B_s \to D_s^*$ transition 75

4.11 Forward backward asymmetry, longitudinal and transverse polarizations (solid lines - excluding resonances, dashed lines - including vector resonances). 77

4.12 Clean observables $P_{1,2,3}$ in whole q^2 range (solid lines - excluding resonances, dashed lines - including vector resonances). 78

4.13 Clean observables $P'_{4,5,8}$ in whole q^2 range (solid lines - excluding resonances, dashed lines - including vector resonances). 79
