

CONTENTS

Introduction	1
1. The occurrence of lipase in the skeletal muscles of vertebrates and its possible significance in sustained muscular activity	5
2. Lipase activity in the vertebrate heart muscle and its relation to basal metabolism	20
3. Histochemistry of muscle lipase	27
4. The pigeon pancreatic lipase	37
5. The pigeon breast muscle lipase	54
6. The rat heart lipase	67
7. Oxidation of fatty acids by pigeon breast muscle mitochondria with triglycerides as substrates	83
8. A histochemical study of dehydrogenase activity in the <u>pectoralis major</u> muscle of the pigeon and bat and certain other vertebrate skeletal muscles	91
9. Alkaline phosphatase activity in the breast muscle of the pigeon and bat	99
10. An evaluation of the metabolic efficiency of the red and white fibres in vertebrate skeletal muscles with particular reference to the ^a bre ^s t muscle of the pigeon and its relation to the energetics of muscular contraction	102
Summary and conclusions	112
Bibliography	117
