

CONTENTS

CHAPTER		PAGE
	INTRODUCTION	1
1	Materials and Methods	6
2	Feather Loss From Capital Tracts of Painted Storks Related to Growth and Maturity : Histophysiological Changes and Lipoid Secretion in the Integument	16
3	Feather Loss From Capital Tracts Related to Growth and Maturity of The Painted Storks : Distribution of Glycosaminoglycans and Phosphatases in the Integument	40
4	Influence of Induce Functional Athyreosis on Histophysiology of Developing Feathers in the Pigeon, <u>Columba livia</u>	58
5	Incubation Patch Formation in House Sparrow, <u>Passer domesticus</u> : Histomorphological Studies.	68
6	Incubation Patch Formation in House Sparrow, <u>Passer domesticus</u> : Possible Role of Glycosaminoglycans (GAG)	82
7	Incubation Patch Formation in House Sparrow, <u>Passer domesticus</u> : Distribution Pattern of Phosphomonoesterases	92

CHAPTER		PAGE
8	Incubation Patch Formation in House Sparrow, <u>Passer domesticus</u> : Distribution Pattern of Lactate, Succinate and Malate Dehydrogenases.	107
9	Incubation Patch Formation in House Sparrow, <u>Passer domesticus</u> : Histochemical Observations of Glucose-6-Phosphate Dehydrogenase, α -Glycerophosphate Dehydrogenase, β -Hydroxy Butyrate Dehydrogenase and Lipids.	122
10	Thyroxine Induced Re-feathering of the Incubation Patch in House Sparrow	138
11	Secretory Function of Avian Epidermis	149
	SUMMARY	168
	BIBLIOGRAPHY	179
