

ACKNOWLEDGEMENT

With a deep sense of gratitude, I record my sincere thanks to Professor R.V. Shah, Head, Department of Zoology, M.S. University of Baroda, for suggestion of the problem, constant encouragement and inspiring guidance. But for his painstaking analysis and constructive criticism, this work would not have been completed.

I extend my gratitude to Drs. P.K. Hiradhar and G.K. Menon for critically going through the manuscript, and Dr. B. Pilo for his generous help in the preparation of the thesis.

I shall be failing in my duties if I do not place on record the invaluable assistance from the University Grants Commission in the form of a Junior Research Fellowship that enabled me to undertake this work.

Finally, I thank all my colleagues in the department for various help rendered to me during the course of this work which made my task easy and a pleasant one.
