

ACKNOWLEDGEMENT

I am deeply indebted to Prof. R. Rajalakshmi for her guidance in the conduct and presentation of the work presented in this thesis. I thank Prof. C.V. Ramakrishnan for his valuable suggestions and encouragement. Thanks are also due to Dr. J.R. Dave, Mr. G.P. Krishnamoorthy and the members of the department of Biochemistry for their help and kind cooperation.

The aid given by the University Grants Commission in granting me a Teacher-Fellowship under the Faculty of Improvement ^{B Faculty} Programme to carry out these investigations is acknowledged gratefully. I am obliged to the management of St. Joseph's College, Tiruchirapalli for encouraging me and granting study leave.
