

LIST OF TABLES

<u>Table No.</u>		<u>Page</u>
1	Number of fruits taken for each trial for chemical analysis	27
2	Details of enzyme assays	34-38
3	Effect of enzyme concentration, period of incubation, glucose concentration and pH on hexokinase activity in the fruit tissues of <u>Citrus acida</u>	40
4	Effect of enzyme concentration, period of incubation, glucose-6-phosphate concentration and pH on phosphohexose isomerase activity in the fruit tissues of <u>Citrus acida</u>	41
5	Effect of enzyme concentration, period of incubation, fructose-6-phosphate concentration and pH on phosphofructokinase activity in the fruit tissues of <u>Citrus acida</u>	42
6	Effect of enzyme concentration, period of incubation, fructose-1,6-diphosphate concentration and pH on fructose diphosphate aldolase activity in the fruit tissues of <u>Citrus acida</u>	43
7	Effect of enzyme concentration, period of incubation, glyceraldehyde-3-phosphate concentration and pH on glyceraldehyde-3-phosphate dehydrogenase activity in the fruit tissues of <u>Citrus acida</u>	44
8	Effect of enzyme concentration, period of incubation, pyruvate concentration and pH on lactate dehydrogenase activity in the fruit tissues of <u>Citrus acida</u>	45
9	Effect of enzyme concentration, period of incubation, glucose-1-phosphate concentration and pH on phosphoglucomutase activity in the fruit tissues of <u>Citrus acida</u>	46

<u>Table No.</u>		<u>Page</u>
10	Effect of enzyme concentration, period of incubation and pH on ascorbic acid synthesis in the fruit tissues of <u>Citrus acida</u>	47
11	Effect of enzyme concentration, period of incubation, ascorbic acid concentration and pH on ascorbic acid oxidase activity in the fruit tissues of <u>Citrus acida</u>	48
12	Activities of enzymes of glycolytic cycle and ascorbic acid synthesizing enzyme and ascorbic acid oxidase in the fruit tissues of <u>Citrus acida</u>	50
13	pH optima for the glycolytic enzymes obtained from different sources	51
14	Chemical composition of the fruit tissues of <u>Citrus acida</u>	53
15	Activity of hexokinase in different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	54
16	Activity of phosphohexose isomerase in different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	57
17	Activity of phosphofructokinase in different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	58
18	Activity of fructose diphosphate aldolase in different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	59
19	Activity of glyceraldehyde-3-phosphate dehydrogenase in different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	61

<u>Table No.</u>		<u>Page</u>
20	Activity of lactate dehydrogenase in different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	62
21	Glycolytic enzymes in the fruit tissues of <u>Citrus acida</u>	63
22	Activity of phosphoglucomutase in different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	66
23	Activity of ascorbic acid synthase in different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	67
24	Activity of ascorbic acid oxidase in different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	68
25	Per cent dry weight of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	72
26	Total sugar content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	73
27	Free sugar content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	74
28	Glucose content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	75
29	Glucose-6-phosphate content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	78
30	Fructose-6-phosphate content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	80

<u>Table No.</u>		<u>Page</u>
31	Fructose-1,6-diphosphate content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	81
32	Lactic acid content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	82
33	Citric acid content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	85
34	Glucose-1-phosphate content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	87
35	Free ascorbic acid content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	88
36	Dehydroascorbic acid content of different parts of the fruit tissues of <u>Citrus acida</u> at different stages of development	89
