

Acknowledgement

I am very thankful to Almighty God for giving me faith in myself. I am grateful for the opportunity, knowledge, courage, ability, and perseverance to accomplish this research work and for standing by me at each stage of my life. Without the blessings of God and nature, I might not have leapt a single step toward this milestone.

I am incredibly grateful to have a guide like Dr Vandana Jayprakash Rao for her continuous guidance, encouragement, and support, which inspires me to work continuously and improvise. She has shared her valuable experience in this thesis's research and writing. Her guidance and extraordinary support helped me complete this work effectively. I cannot have words to express her dedication towards my work despite her social responsibilities.

I am very thankful to my DRC members, Dr B. J. Chauhan, Head; Dr S. N. Soman, Ex-Head; Dr V. V. Mathane, and Dr S. D. Kahar of Metallurgical and Materials Engineering Department, Faculty of Technology and Engineering, The M. S. University, Baroda for their constant support. I thank external DRC member Dr B. R. Sengupta, Chemical Engineering Department, for her guidance and valuable support. I thank BoS members Dr Nirav Jamnapara, Dr Swarn Bedarkar, and Prof. D. R. Lodhari. The DRC and BoS members' valuable suggestions and reviews enabled me to complete my work successfully.

I am very thankful to Mr Nikunj Dave and his father for providing me with a testing facility at Met-Heat Engineers Pvt. Ltd., Vadodara. I thank my guide and supporting staff for helping me with the department's SEM and XRD testing and analysis.

I am also thankful to Prof. (Dr) V. K. Srivastava, Honorable Vice-Chancellor. I express my gratitude to the Registrar, Controller of Examination, and all staff members of the PhD section of The Maharaja Sayajirao University of Baroda, Vadodara, for their permission, help and support for this research work. I am grateful to my PhD thesis examiners for devoting their valuable time to evaluating the thesis. At last, my sincere thanks to our faculty Dean, Prof. (Dr) Dhanesh Patel, for his support and encouragement.

I would also like to thank my parents' institute, Government Engineering College, Gandhinagar, for providing all kinds of support during my research work. I sincerely thank Dr Sweta P. Dave, Principal, and Dr I. B. Dave, Head of The Metallurgy Engineering

Department, for their constant support and motivation. I am also thankful to my colleagues, faculties, and well-wishers for all their support and motivation.

I want to dedicate my THESIS to my wife, son, and parents, especially my Late father Vishnuprasad Ramanlal Mahant, who has taught, guided, motivated, and supported me in achieving my academic goals. I wholeheartedly appreciate my wife, Pallavi, for her care and sacrifices. She was always at my side during the most challenging times, offering encouragement and motivation to finish my research. I want to thank my sister and brother for their warm wishes. I am very grateful to my loving son Krutarth, who allowed me to devote his precious time to pursue my work, and his innocence and patience encouraged me to work hard. I am thankful to my mother-in-law and father-in-law, who supported me throughout this journey.

I want to thank Mr Maulik Thakkar, Mr Shital Amin, Dr Daulat Kumar Sharma, Dr Harshad H. Jadav, Dr Sonam Patel, Dr Hemant Panchal, Prof. B. R. Rana, Dr Minal Dani, Dr Mukesh Ranjan and Mr Vivek Singh for their support whenever required in research work. I thank all the spiritual Gurus who helped me to postulate on the right path. This work reflects immense support from many valuable people, knowingly or unknowingly; naming all of whom is difficult. I give respect to every one of them.

Devangkumar Vishnuprasad Mahant,

Research Scholar,

The M. S. University of Baroda, Vadodara.
