

APPENDIX B : Sex Role Inventory

Given below is a list of 32 personality traits (characteristics) in alphabetical order. Please read the list carefully and then indicate on a 7 point rating scale (as given below) the degree to which each trait describes you.

A sample scale would be :

1	2	3	4	5	6	7
Never or almost never true						Always or almost always true

Please note that the 7 point scale to be used, ranged from 1 ( never or almost never true ) to 7 ( always or almost always true ) and is labeled at each point ( i. e., 1, 2, 3, 4, 5, 6, 7 ) in increasing order. In rating each trait, please choose the number which would be most nearly true for you i.e. which would most accurately describe where you will fall on the scale as far as the particular trait is concerned. Once you have decided the number (i.e., degree) put that number in the space provided for 'Rating ' for that trait.

Example :

Suppose you are rating the degree to which the trait 'SYMPATHETIC' describes you. If you think that the description is 'always or almost always true' then you would put the number 7, but, if you think that the description is 'never or almost never true' then you would put the number 1. If you think that the description is neither true nor untrue for you, then you would put 4. But try to use rating number 4 as little as possible and choose any one of the other rating numbers ( i. e., 1, 2, 3, 5, 6, 7 ) that most accurately indicates the degree to which the trait 'SYMPATHETIC' describes you. Follow the same procedure for rating each of the traits.

It is very important for the purpose of the present study that your rating should describe your characteristics 'as you are' and not as you 'should be' or 'ought to be'.

Be sure to rate all the traits.
