Chapter 1 Tebuconazole- Physical-Chemical Properties, Environmental Fate and

Methods of Analysis in different matrices

1.1	General Information	I-2
1.2	Physical and chemical properties	I-3
1.3	Dissipation	I-4
1.4	Pesticides transport in aqueous systems	I-7
1.5	Methods of Analysis	I-10
1.6	References	I-16

Chapter 2 Adsorption-desorption studies of Tebuconazole in soils using HPLC

2.1	Introduction	II-1
2.2	HPLC method validation	II-2
2.2.1	Preparation of solutions	II-2
2.2.1.1	Tebuconazole reference standard solution	II-2
2.2.1.2	Tebuconazole technical sample solution	II-3
2.2.2	Validation of HPLC method	II-3
2.2.2.1	Specificity	II-4
2.2.2.2	Linear dynamic range	II-4
2.2.2.3	Limit of detection (LOD) and limit of quantitation (LOQ)	II-5
2.2.2.4	Precision (% RSD)	II-6
2.2.2.5	Accuracy (% Recovery)	II-7
2.3	Adsorption – Desorption studies	II-9
2.3.1	Collection of soils	II-9
2.3.2	Characterization of soils	II-11
2.3.2.1	Soil pH	II-11
2.3.2.2	Soil organic carbon (SOC) contents	II-11
2.3.2.3	Total nitrogen content	II-13
2.3.2.4	Total sand, silt and clay content analysis (Particle size analysis)	II-15
2.3.2.5	Water holding capacity	II-18
2.3.2.6	Determination of cation exchange capacity (CEC)	II-19
2.3.3	Adsorption-desorption test procedure	II-23

2.3.3.1	Reagents and standards	II-23
2.3.3.2	Equilibration of Bardoli and Nanivahiyal soil with 0.01 M CaCl ₂ solution	II-23
2.3.3.3	Sampling and processing of samples drawn at different time intervals	II-24
2.3.3.4	Adsorption kinetics	II-24
2.3.3.5	Desorption kinetics	II-25
2.3.3.6	Adsorption and desorption isotherm	II-25
2.3.3.7	Calculations	II-26
2.3.3.8	Adsorption-desorption test	II-28
3.3.3.8.1	Selection of soil-solution ratio and determination of adsorption kinetics	II-28
3.3.3.8.2	Desorption kinetics	II-32
3.3.3.8.3	Adsorption isotherm	II-35
3.3.3.8.4	Desorption isotherm	II-41
2.4	References	II-45

Chapter 3 Ultrasound Assisted GC-NPD technique for determination of trace levels of tebuconazole residues in Garlic, Soil and Water Samples

3.1	Introduction	III-1
3.2	Materials and Methods	III-3
3.2.1	Reagents and standards	III-3
3.2.2	GC and operating conditions	III-3
3.2.3	Optimization of GC-NPD operation condition	III-4
3.2.4	Samples preparation of garlic, soil and water for recovery studies	III-9
3.2.5	Pesticide application and sampling	III-9
3.3	Results and Discussion	III-10
3.3.1	Effect of the solvents an extraction	III-10
3.3.2	Influence of samples matrix on recovery	III-11
3.3.3	Effect of sonication and centrifugation time	III-11
3.3.4	Effect of solvent volume	III-13
3.3.5	Feature of the method	III-14
3.3.6	Analysis of garlic, soil and water during harvesting of garlic	III-16
3.4	Conclusion	III-19
3.5	References	III-20

Chapter 4 Dissipation of Tebuconazole in soil

4.1	Introduction	IV-1
4.2	Materials and Methods	IV-3
4.2.1	Chemicals and Reagents	IV-3
4.2.2	Instruments and Operating Conditions	IV-3
4.2.3	Soils	IV-4
4.2.4	Extraction and Clean up of samples	IV-5
4.2.5	Analysis and Recovery Study	IV-6
4.2.6	Dissipation Experiments for Non-Sterile and Sterile Soils	IV-7
4.2.7	Data and Statistical Analysis	IV-8
4.3	Results and Discussion	IV-9
4.4	References	IV-18

Chapter 5 Investigation of Effect of pH on Dissipation of Tebuconazole in aqueous medium

5.1	Introduction	V-1
5.2	Materials and Methods	V-1
5.2.1	Chemicals	V-1
5.2.2	GC and Operating Conditions	V-1
5.2.3	Preparation of Solutions	V-2
5.2.4	Recovery studies	V-3
5.2.5	Spiking and Incubation of water Sample at pH 4, 7 and 9	V-4
5.2.6	Extraction and Cleaning of Samples	V-4
5.2.7	Monitoring of Sterility	V-5
5.3	Results and Discussion	V-5
5.4	Reference	V-10

Chapter 6 Conclusions and future Scope of Work

6.1	Conclusions	VI-1
6.2	Future Scope of the Work	VI-2
