

The programme for ecological management in such an area must be based on the survey of historical land use pattern and potential productivity of the region and understanding of soil's physical properties and its relation to soil moisture and to do so, study area has been classified into four geomorphological regions considering various geo-environmental parameters, which will help to take area specific morpho-ecological management decision.

## **CONTENTS**

<b><u>Chapters</u></b>	<b><u>Page</u></b>
<b><u>No.</u></b>	
<b><u>Chapter –1 Introduction</u></b>	<b>1-8</b>
1.1 <i>Concept of Geomorphodynamics</i>	1-5
1.2 <i>Concept of Morpho-ecology</i>	6-8
<b><u>Chapter-2 Environmental outlines of the Little Rann of Kutch</u></b>	<b>9-31</b>
2.1 <i>Geological setting of the Little Rann of Kutch</i>	10-16
2.2 <i>Geographical / Physical setting of the Little Rann of Kutch</i>	17-26
2.3 <i>Eco-Climatic setting of the Little Rann of Kutch</i>	27-31
<b><u>Chapter- 3 Approach to the study of Geomorphodynamics &amp; Morpho-ecological Management in the Little Rann of Kutch</u></b>	<b>32-59</b>
3.1 <i>Introduction</i>	32-34
3.2 <i>Literature review</i>	35-47
3.3 <i>Data base &amp; Methodology</i>	48-51

3.4	<i>Aim &amp; objective</i>	52
3.5	<i>Scope of study</i>	53-54
3.6	<i>Limitations</i>	55-56
3.7	<i>Organization of study</i>	57-59
<b>Chapter-4</b>	<b><u>Studied variables of the Geomorphic phenomenon</u></b>	<b>60-94</b>
4.1	<i>Morphodynamic Environment</i>	60-64
4.2	<i>Study of sediment properties and techniques of analysis</i>	65-94
a)	<i>Field methods</i>	70-71
b)	<i>Laboratory methods</i>	71-94
(i)	<i>Grain size analysis</i>	71-74
(ii)	<i>Plasticity of soil</i>	75-79
(iii)	<i>Total moisture content</i>	79-81
(iv)	<i>Porosity and Permeability</i>	81-83
(v)	<i>Total soluble salt content.</i>	84-86
(vi)	<i>Natural volume and Compact volume</i>	86-87
(vii)	<i>Water holding capacity</i>	88-89
(viii)	<i>Bulk density</i>	90-92
(ix)	<i>Hygroscopic absorption</i>	92-94
<b>Chapter-5</b>	<b><u>Regionalization of the studied area &amp; its Geomorphic characteristics</u></b>	<b>95-138</b>
5.1	<i>Fringe zone, two miles of frontier around the Little Rann of Kutch</i>	98-108
5.2	<i>Dry Rann, Eastern and Central part of Rann</i>	109-126
5.3	<i>Wet Rann with numerous creeks, Western part of Rann</i>	127-132
5.4	<i>Island (Bet)</i>	133-136
5.5	<i>Factors, processes &amp; forms of desertification</i>	137-138
<b>Chapter-6</b>	<b><u>Morpho-ecological Planning &amp; Management</u></b>	<b>139-160</b>
6.1	<i>Fringe zone</i>	145-146
6.2	<i>Dry Rann depression</i>	147-148
6.3	<i>Western wet Rann</i>	149-150
6.4	<i>Islands (Bets)</i>	151
6.5	<i>Management issues &amp; challenges</i>	152-158
6.6	<i>Priorities identified in the study area</i>	159-160

**Chapter-7 Summary & Conclusion**  
**170**

**161-**

- **Bibliography**  
**179**

**171-**

- **Photographs**  
**15**

**Plate 1-**

## **LIST OF TABLES**

<b>Table No.</b>	<b>Title</b>	<b>Page No.</b>
4.1	Mechanical Analysis of Sediments	74
4.2	Behaviour of Clay Soil (Vertisols) in Different Moisture Regimes	76
4.3	Plasticity Measurement	79
4.4	Moisture Content	81
4.5	Porosity	83
4.6	Total Soluble Salt Contain (TSS)	86
4.7	Natural Volume and Compact Volume	87
4.8	Bulk Density	89
4.9	Available Water Capacity by Soil Texture	91
4.10	Water Holding Capacity	92
4.11	Hygroscopic Absorption capacity	93-94
5.1	The Classification of Study Area on The Basis of Prevailing Climate, Geomorphological and
